

The Autonomous **AI Growth Engine** For Marketing Agencies

Agnelix orchestrates multi-agent systems that scan buying triggers, enrich decision-makers, and execute highly targeted outreach on autopilot.

FOUNDER-LED ENGINE

Engineered for scale & performance

SEED ROUND

Targeting GTM expansion & tech moat

The Prospecting Bottleneck

B2B lead generation is highly manual, inefficient, and facing unprecedented compliance risk.

1. Manual Time Drain	2. Stale Static Lists	3. Blacklisted Domains
Agencies spend 70% of outbound sales time manually searching, profiling websites, and auditing local indicators.	Traditional data vendors sell static, outdated database lists with zero buying signals, resulting in poor reply rates.	Unpersonalized templates sent from key domains trigger strict modern spam filters, burning valuable domain reputations.

Critical Impact: Outbound acquisition cost is skyrocketing while effectiveness is dropping, causing high agency churn.

The Autonomous Growth Solution

Agnelix replaces human SDR workflows with a state-machine based agent system.

■ Live Trigger Capture	■ Multi-Agent Triad	■ Hard ROI Attribution
We scan review drops, new locations, SEO drops, and hiring listings to capture companies with immediate intent.	Scout, Profiler, and Closer agents work dynamically in loops to build target profiles and personalized hooks.	Syncing all emails and Calendly bookings directly back to closed deals to demonstrate verified, undeniable ROI.

Result: 12x lower outbound customer acquisition cost (CAC) and 24/7 autonomous deal booking.

The 6 Core Micro-Engines

Six proprietary engines operating in sync under a unified platform architecture.

1. Signal Intelligence Monitors Google Maps API, Job listings, and BuiltWith to catch intent signals.	2. Dynamic Scoring Aggregates signals, recency, and fit into a dynamic predictive intent score (0-100).	3. AI Outreach Agent Writes personalized copy, handles OOO buffers, and counters sales objections automatically.
4. ROI Analytics Calculates multi-touch attribution (first, middle, and last touch) to credit closed revenue.	5. Compliance Layer Auto-scrubs Do-Not-Call registries, enforces local quiet hours, and logs GDPR compliance.	6. Agency Admin Multi-tenant White-labeled management layer so agencies can instantly resell to sub-clients.

Autonomous Agent Triad (LangGraph)

How specialized agents work together inside a state-machine based error fallback loop.

AGENT 1: THE SCOUT		• Monitors trigger events • Scrapes Google Maps profiles • Identifies bad reviews / hiring indicators • Feeds raw leads to state graph
AGENT 2: THE PROFILER		• Queries Apollo.io & LinkedIn APIs • Finds owner or manager contact details • Verifies email with ZeroBounce • Performs jurisdiction & GDPR analysis
AGENT 3: THE CLOSER		• Drafts highly personalized cold copy • Pushes sequence steps dynamically • Classifies replies & counters objections • Directly books Calendly meetings

The Moat: Traditional systems rely on linear sequencing. Agnelix agents self-correct (e.g., if Closer fails, state redirects Profiler to find an alternative contact).

Market Opportunity & Audience

B2B outbound prospecting is transitioning completely to autonomous intelligence agents.

120,000+ Global Marketing Agencies

Digital agencies are high-value distributors. A single agency onboarding represents 10 to 50 local business sub-accounts, creating a high leverage expansion mechanism.

\$15.2 Billion Total Addressable Software Market

Agencies are already paying thousands of dollars for separate scraping tools, email warmup tools, databases, and SDR reps. Agnelix bundles the entire stack into a single autonomous product.

Hybrid Monetization Engine

Aligning product pricing directly with agency ROI results in massive LTV and expansion margins.

1. Multi-Tier SaaS	2. Performance Booking	3. Integrated Revenue Share
\$97 – \$2,997 / mo Monthly subscription tiers based on the number of active pipelines, leads enriched, and organization sub-accounts.	+\$150 – \$500 / meeting Value-aligned performance fee charged for every qualified meeting booked directly in the client's calendar.	5% – 10% Closed Value Commission share collected from deals closed using native CRM pipeline sync integrations.

Competitive Advantage Matrix

How Agnelix bypasses and outperforms traditional database competitors.

Dimension	Agnelix Autonomous Loop	Traditional CRM / Lists (e.g. Apollo)
Lead Source	Real-time trigger monitors (bad review, job posting, location open)	Static scrapers & stale databases
Personalization	Hyper-personalized icebreakers generated per trigger signal	Static custom tags / templated mail-merges
Deliverability	Automated warmup domains and strict compliance quarantine filters	Cold domain spamming with zero validation filters
Attribution	Built-in closed-loop analytics to map spend directly to wins	Relies entirely on manual third-party CRM setup

GTM & Exponential Distribution

Reaching \$100K MRR inside 12 months with low-friction organic loops.

1. White-Label Viral Loop	Agencies deploy our software under their own brand to provide value to their client portfolios. Every onboarded agency naturally acts as a distributor of our software.
2. CRM & App Integrations	Publishing direct integrations into GoHighLevel (GHL), HubSpot, and Salesforce marketplaces, listing our engine where agencies already operate.
3. Dogfooding Outreach	We demonstrate value by using our own Scout-Profiler-Closer agents to discover target agencies, warm them, and book pitch meetings autonomously.

Financial Projections & Economics

Highly scalable model with strong unit economics and short payback cycles.

(24-Month Projection)		• Month 6 MRR: \$25,000 • Month 12 MRR: \$120,000 • Month 24 MRR: \$600,000 • Projected Gross Margin: 84%
onomics		• LTV : CAC Ratio: 5.5x • Payback Period: 21 Days • Monthly Churn (Target): < 2.5% • Average ACV (Agency): \$4,200

The Seed Ask & Milestones

Accelerating development of the agentic framework and executing GTM channels.

on Focus		• 55% Engineering & Scrapers: Scale agent orchestration framework and i engines. • 30% GTM & Marketing: Direct org performance-based marketing agenc acquisition. • 15% Operations & Legal: Genera advanced local quiet hours complian
Million ROUND CAPITAL		Let's build the autonomous outbound layer together.
